

# PRATT & WHITNEY SERVICES

## Overhaul Management

Duncan Aviation will manage your next engine event from start to finish. We work with all major Pratt & Whitney engine programs and authorized service providers.

## Fleet Programs

Duncan Aviation offers fleet discount programs to operators with Pratt & Whitney powered aircraft. Also, we offer the most efficient pricing on worksopes involving additional service events.

## Your Place or Ours

We perform PT6, JT15D, and 500 series Hot Section Inspections on-wing. Duncan Aviation also completes PT6 and JT15D, 500, 300 series line maintenance at your place or ours.

## Rapid Response Teams

AOG and have engine trouble, Duncan Aviation can get you back in the air. Call 877.522.0111 and a Duncan Aviation technician will be dispatched to your location. Rapid Response Teams are strategically located across the United States so we can get to you fast!

# The Duncan *Elite* Engine Leadership Program

We offer this overhaul management program to all civilian PT6, JT15, PW300 and PW500 engine models. The program is global with customers located throughout the world.

We guarantee a "No Surprises" final bill.

### How do we do it?

We know what questions to ask, what programs apply, when costs are fair, and how to apply real value to each dollar while preserving the integrity of the engine. We will review and interpret your engine logbooks and identify Service Bulletins,

ADs and life limited components that may be a factor in the event. We will apply all knowledge gained and negotiate the most sincere estimates from overhaul vendors of your choice.

In cooperation with overhaul vendors, we pre-purchase components at greater savings and pass the savings on to you. We travel at least once to the overhaul vendor and view the engine after disassembly. With over 50 years in the business, we know what parts should be under warranty, what campaigns apply, and when to be creative in the effort to reduce cost. We have set limits for each engine model and before we accept the engine, we analyze performance from the test cell and compare it to data collected prior to overhaul. When all is within limits, only then will the engine ship back to us. Duncan Aviation steps in and represents your best interest whatever the case. Ours is a relationship business and we will be your knowledgeable friend representing your interests during the event and after.

We will share with you the exact cost of the work being performed and make you aware of our efforts to reduce cost of the overhaul. You will benefit from the savings we are able to attain.

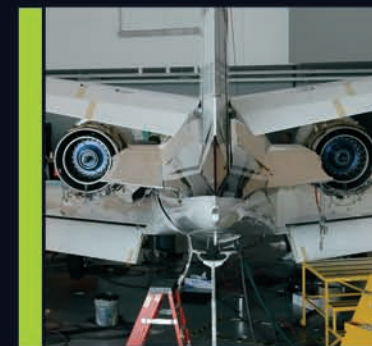

### We also offer comprehensive engine capability:

We are a one-stop-shop for all your aviation needs. Let us share with you what our 2,000 dedicated employees are able to deliver. We will do what it takes to meet your needs in your hangar or ours. We perform PT6, JT15D, and 500 series Hot Section Inspections on-wing. We also perform PT6 and JT15D, 500, 300 series line maintenance. We are authorized by Pratt & Whitney to perform all warranty work and work with all Designated Overhaul Facilities.

We work with all major Pratt & Whitney programs including Dallas Airtight, ESP, JSSI, Power Advantage and Power Advantage Plus.

### Nationwide support from our Rapid Response Teams:

With locations throughout the country, we will be there for you – in your hangar, when you need us most. Call 877.522.0111 for 24-hour assistance.

Less Stress. No Surprises. A One-of-a-Kind Value.
