DUNCAN AVIATION FACTS

FACILITIES INFORMATION & CAPABILITIES

Duncan Aviation has been voted the #1 Avionics Center in the nation every year since 1985 by readers of Professional Pilot magazine (Phase Survey).

SATELLITE NETWORK HISTORY

A little over 20 years ago, Robert Duncan pursued an idea to bring Duncan Aviation's avionics excellence to FBOs across the U.S. The idea was to have small shops with a clean, high-tech image in extremely visible locations that pilots would see upon arrival at the FBO. Soon the first Duncan Aviation Satellite opened with Beckett Aviation at Houston's Hobby Airport. Today, Duncan Aviation has more than 20 of the popular avionics shops throughout the U.S.

SATELLITE SOLUTIONS

Duncan Aviation's satellite network provides comprehensive solutions to aircraft operators during times of critical, casual or remote location need. Although line service is the primary work of satellites, many provide popular installs and coordinate any repair, overhaul, exchange, loaner or part needed for jet, turbine, piston-powered aircraft and helicopters 24/7/365.
