Important Clarification From AlliedSignal Concerning Approved Oils For TFE731 Engines

This communication is to provide clarification as to approved oil for the TFE731 engine and the effect on MSP coverage and carbon seal warranty.

For the TFE731-2 through-5 family, all of the oils listed in the Light Maintenance Manual (LMM) are approved. Third generation oil is not required to maintain carbon seal warranty or MSP coverage. However, the preferred oil is the third generation oil due, to the increased resistance to the formation of coke.

For the TFE731-20/-40/-60 family, the LMM specifies third generation oil and therefore it must be used to maintain warranty and MSP coverage.

AlliedSignal is in the process of updating Service Information Letter F731-82 to provide clarification of this important issue.

For TFE731 technical info, we have the experts with whom you should speak.

*Our 731 Engine Teams consist of technicians with hundreds of combined years of experience.
Need technical advice? Call Duncan's 731 Tech Rep, Doug Alleman, at 402.479.1689*

*In Lincoln, contact **Cecil Sloan** or **Jon Dodson**
at 402.475.2611 or 1.800.228.4277*

*In Battle Creek, contact **Dan Arrick** at
616.969.8400 or 1.800.525.2376*
