Install Prizm Aircraft Lighting During Your Next Service Event

Prizm cabin LED lighting was designed, engineered, and developed by Elliott Technologies to create a cost-effective, app-based lighting solution for business aircraft. Available for most turbine-powered aircraft, Prizm LED lighting offers full-color mood lighting which can be installed in your airplane at a price that is competitive with white-only lighting options.

Why Install Prizm Aircraft Lighting Now?

- Can pay for itself in as little as five years*
- Can be installed during a routine inspection event or interior refurbishment
- Utilize custom created moods to transform the cabin ambiance during any phase of flight
- Interfaces with the current cabin management system and/or full app control
- Enjoy peace of mind with the industry's longest warranty – three years
- Configure your aircraft lighting to your exact needs
- Further customize your in-flight experience with custom lighted cup-holders
- Full-color spectrum mood lighting at white-only light prices
- Quickly and easily change the mood and colors of your interior for any possible situation

*Based on average light and midsize jet lighting maintenance costs
