

DUNCAN
AVIATION

COMPREHENSIVE HTF ENGINE SERVICE & SUPPORT

Duncan Aviation is the world's largest family-owned Honeywell Authorized Service Center with Line & Minor capabilities to support the HTF7000/AS907 Series turbine engines.

ON THE ROAD, BRINGING MOBILE ENGINE SERVICES TO YOU

Teams of Duncan Aviation factory-trained Engine Technicians are on-call and ready for dispatch to your location, any time of the day, anywhere in the world. Strategically located across the United States, they are capable of supporting your most critical AOG needs on HTF7000/AS907 series turbine engines installed on Gulfstream G280, Bombardier Challenger 300/350, Embraer Legacy 450/500, Praeter 600, and Cessna 700 Longitude aircraft.

LET US JOIN YOUR TEAM

With one call, we can be at your location with the proper tooling to perform the 4,800/9,600-hour (Praeter: 4,500/9,000-hour) borescope inspections, periodic maintenance, hot end entry, aft sump bimodal repair, Service Bulletin incorporation, and troubleshooting.

We have a dedicated Honeywell technical representative on staff available 24/7 for troubleshooting and technical assistance of any kind.

Our mobile teams are supported by a state-of-the-art Honeywell Authorized HTF7000 Minor maintenance facility located in Lincoln, Nebraska. We continue to invest in specialized tooling to reduce risk and control downtime.
